MOTORWAY ORDER WORTH € 140 MILLION FOR STRABAG IN SLOVAKIA

- **Construction of D1 motorway between Hričovské Podhradie and Lietavská Lúčka**
- **Contract value € 427 million, STRABAG's share about € 140 million**
- **Construction period 48 months**

Vienna, 16 December 2013 As part of a consortium, STRABAG s.r.o., the Slovak subsidiary of the publicly listed construction group STRABAG SE, has signed the contract to build a section of the D1 motorway in northern Slovakia. The order has a total value of € 427 million, with STRABAG's share amounting to about € 140 million. The length of the motorway section between Hričovské Podhradie and Lietavská Lúčka amounts to approximately 11 km. The construction works comprise eleven bridges, two tunnels as well as all access roads.

"After the R2 expressway, this is already our second large infrastructure order in Slovakia within the past few weeks. Slovakia is showing that it is pressing ahead with investments in infrastructure," says Thomas Birtel, CEO of STRABAG SE.

The D1 motorway is part of the E 50 international transport route leading from Paris via Nuremberg and Prague through Ukraine to Russia. The consortium is composed of four partner companies: Doprastav (32 %), Váhostav (32 %), STRABAG (32 %) and Metrostav (4 %). The construction period will take 48 months.

*The corporate group of **STRABAG SE** is one of the leading European construction groups. Specialised group companies, operating under a number of different brands such as STRABAG and Züblin, provide their services in all fields of the construction industry covering the entire construction value chain. Thanks to the hard work and dedication of its approximately 74,000 employees, STRABAG SE generates an output volume of about € 14 billion. At the same time, a dense network of numerous subsidiaries in Eastern and South-East Europe, in selected markets of Western Europe and, increasingly, on other continents is helping to expand the area of operation of STRABAG SE far beyond the borders of Austria and Germany. The group's proprietary raw materials basis and steady knowledge transfer ensure the highest quality construction at the best price – all around the world.
