- **STRABAG Infrastructure & Safety Solutions GmbH (SISS): a single-source provider of intelligent infrastructure solutions**
- **Merger of Center Communication Systems GmbH and STRABAG Anlagentechnik GmbH**

Vienna, 4 March 2016 STRABAG, the technology group for construction services, has merged its 100 % subsidiaries Center Communication Systems GmbH (CCS) and STRABAG Anlagentechnik GmbH (SAT). The new company, with the name STRABAG Infrastructure & Safety Solutions GmbH, was entered in the commercial register on 24 February 2016. Managing directors are Gerhard Jelinek and Werner Kribernegg.

“With the merger of our activities in traffic safety technology, tunnel equipment and communications technology, we are making better use of the strong synergies that exist between these two business fields. As a provider of complete solutions for intelligent infrastructure, we are in a position to offer an extensive range of services from a single source – from train radio, video surveillance and passenger information systems to answering point technology to traffic and tunnel technology,” the two directors say.

Both companies well-established on the market

Center Communication Systems GmbH, headquartered in Vienna and with branch offices in Austria, Germany, Switzerland and Benelux, developed communications systems and safety technology for emergency and rescue services, public transport, public safety and industry to protect people and valuables. This includes wireless transmission systems for tunnels and buildings as well as railway communications systems and public safety answering point technology for emergency and rescue services. CCS is currently working on the expansion and modernisation of the tunnel transmitter system for the Vienna underground.

STRABAG Anlagentechnik GmbH was awarded the contract last summer to modernise the electrical and mechanical equipment for the Oswaldiberg Tunnel on the A10 motorway in Austria. The company, as general contractor, delivered end-to-end solutions in the fields of

tunnel equipment and transport technology and is a leader on the European market.

STRABAG SE is a European-based technology group for construction services, a leader in innovation and financial strength. Our services span all areas of the construction industry and cover the entire construction value chain. We create added value for our clients by our specialised entities integrating the most diverse services and assuming responsibility for them. We bring together people, materials and machinery at the right place and at the right time in order to realise even complex construction projects – on schedule, of the highest quality and at the best price. The hard work and dedication of our more than 73,000 employees allows us to generate an annual output volume of more than € 14 billion. At the same time, a dense network of numerous subsidiaries in many European countries and, increasingly, on other continents is helping to expand our area of operation far beyond the borders of Austria and Germany.
