

How we live safety at STRABAG

Safety is a priority at STRABAG. Each and every one of us must act responsibly and proactively – so that our more than 70,000 employees, as well as those of our clients and our partner companies, come to work and return home healthy and safe every day. Our clear objective is the reduction of accidents and lost working hours to zero. And we courageously take up this challenge with the following message: Vision Zero – Zero Accidents.

This objective equally requires our managers and employees to make a personal contribution. Because safety can only be achieved as a team.

Executive officers and upper management

The safety and protection of our employees, as well as those of our clients and our partner companies, is a top priority at STRABAG. It is our responsibility to create the necessary conditions. Because safety is worth it!

Leadership positions

When it comes to the subject of safety, we are consistent and uncompromising. Part of our job is to serve as role models, motivating our employees to pay attention to working safely. And we resolutely demand the same of our partner companies and temporary staff on the construction site.

Work safety representatives

We offer advice, educational material, training and assistance on the subject of safety and serve as disseminators as well as central contact persons for work safety at STRABAG. We support the managers, leaders and employees in implementing all measures for safety at work.

Blue-collar and white-collar employees

We are all aware of the importance of workplace safety, both at the construction site and in the office. This awareness translates to more safety – for us and for our colleagues and co-workers. Together, we make safe teamwork possible.

Dr. Thomas Birtel
CEO of STRABAG SE
On behalf of the entire Management Board

There's nothing more valuable than a healthy life. On the construction site or in the office, the seconds before our next move could decide ...

- if we come home to our families in good health in the evening.
- if we will engage with our work full of the same energy the next day.
- if we are fit in our free time.

How we can make STRABAG a safer place to work every day:

- 1▶Stop!** Take your time and assess the situation before you act. The seconds before your next move are decisive!
- 2▶Think!** Take a good look at the next workstep, prepare it well and stand up for a safe work environment.
- 3▶Act!** Act responsibly and work safely. Choose safety – for you and your team.
