

STRABAG LANDS NEW ORDERS INTERNATIONALLY WORTH € 230 MILLION

- Construction of a flood protection dam for € 92 million in Oman
- Two road construction projects in Oman – total contract value € 28 million
- € 88 million project in Thailand: production of 1.73 million concrete sleepers for railway construction
- Planning and construction of an LNG tank in Brunei: € 23 million

Vienna, 26 July 2013 The publicly listed construction group STRABAG SE has been very successful internationally in the past few months, as four new contracts have increased the order backlog by more than € 230 million. "This year, we have already landed contracts from the Arabian Peninsula to Thailand. We are active outside of our European core markets when there is demand for our know-how as a technology company in the construction sector," says Thomas Birtel, CEO of STRABAG SE, explaining the strategy.

Oman's Ministry of Regional Municipalities and Water Resources awarded STRABAG Oman LLC the contract to build a flood protection dam near the city of Sur. The order value amounts to € 92 million. In addition to the construction of a 1.2 km earth dam, the project also comprises considerable earthworks and erosion protection works in the drainage of the Wadi Canal as well as the rerouting of 5 km of an existing rural road. Construction is scheduled for completion by August 2016.

The current state of the road between Wadi Mingal and Wadi Bani Jaber

Also in Oman, the Ministry of Transport and Communication awarded to STRABAG Oman LLC the contract to expand and upgrade the road between Wadi Minqal and Wadi Bani Jaber. The planned asphalt road will be 19 km long and will be built for around € 28 million. A total of 2 million m³ of earth will have to be moved during the 24 months of construction.

In Thailand, STRABAG has been commissioned to produce and deliver 1.73 million concrete sleepers within five years for installation at three railway construction projects. A sleeper factory will be built north of Bangkok within the coming year specifically for the € 88 million project.

In Brunei, Japanese plant manufacturer Toyo Kanetsu K.K. has commissioned STRABAG International GmbH to plan and build a concrete outer tank for the interim storage of liquefied natural gas (LNG). The tank, measuring 76 m in diameter and 46 m in height, will be able to store up to 120,000 m³ of natural gas at -162°C starting in mid 2015.

*The corporate group of **STRABAG SE** is one of the leading European construction groups. Specialised group companies, operating under a number of different brands such as STRABAG and Züblin, provide their services in all fields of the construction industry covering the entire construction value chain. Thanks to the dedication of its approximately 74,000 employees, STRABAG SE generates an output of about € 14 billion. At the same time, a dense network of numerous subsidiaries in Eastern and South-East Europe, in selected markets of Western Europe and, increasingly, on other continents is helping to expand the area of operation of STRABAG SE far beyond the borders of Austria and Germany. The group's proprietary raw materials basis and steady knowledge transfer ensure the highest quality construction at the best price – all around the world.
